AI Agent Studio demo 26A.

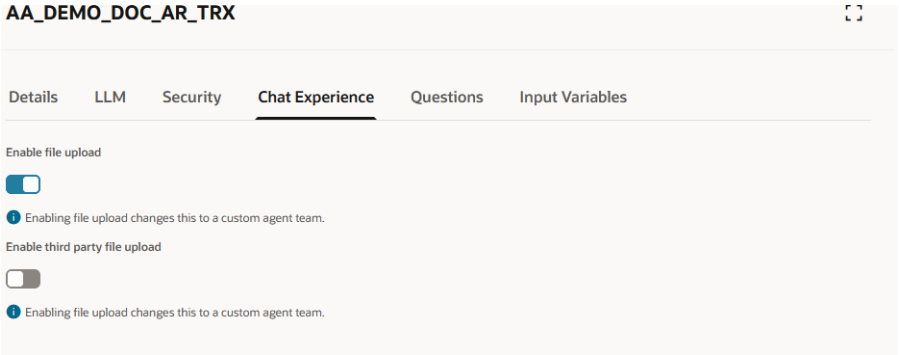
Agent Team of type “Supervisor”.

Upload file with “Chat experience” + Document Processor (3 JSON formats)

Introduction/Goal.

Release 26A is full of new features.

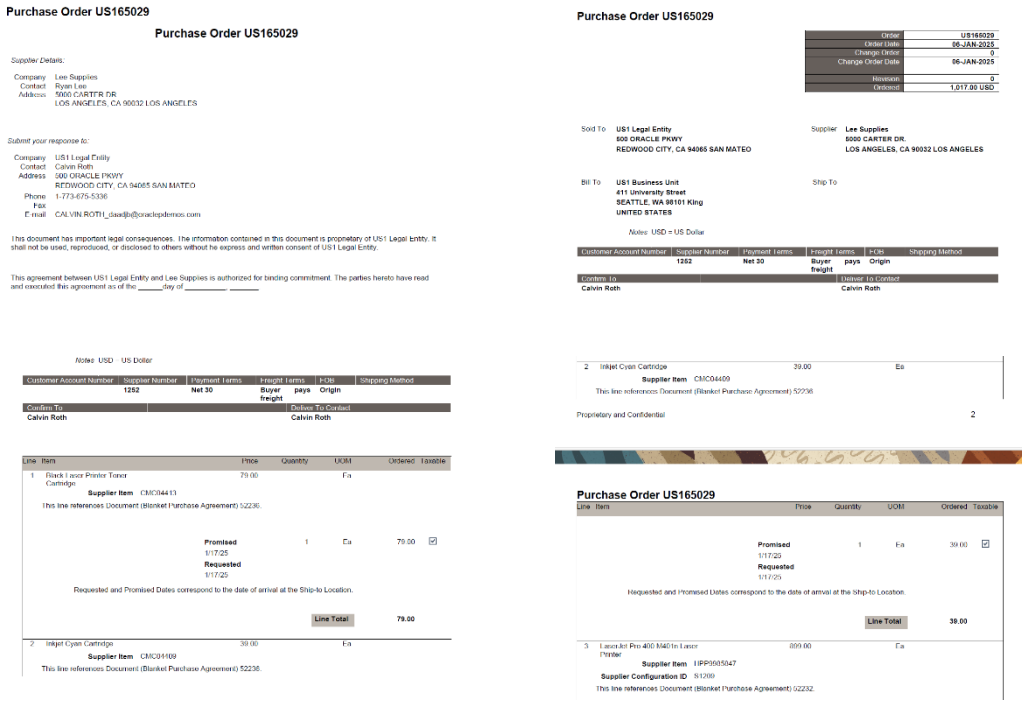
Chat experience is one of them.



We will show a basic demo combined with “MultiFileProcessor” tool and different Prompts.

Preparatory steps.

We will use this PDF purchase order file as sample.

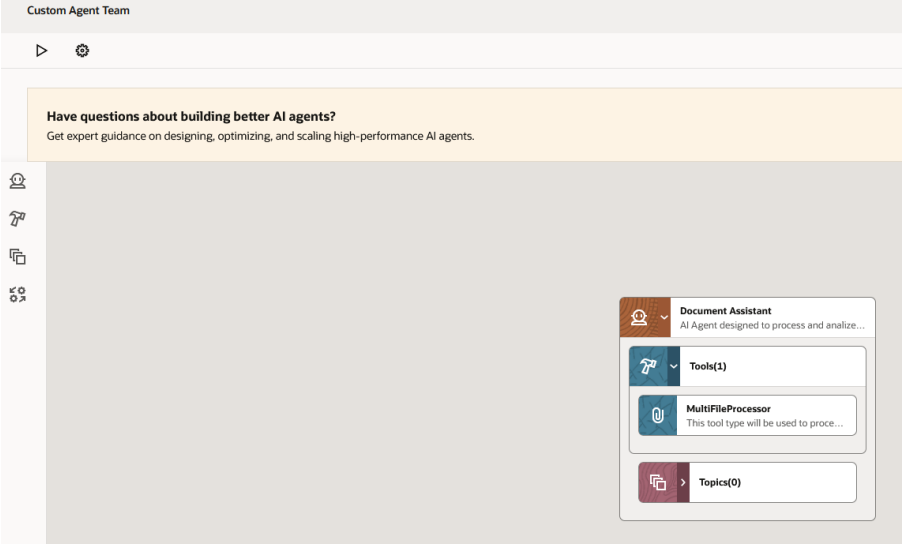


Purchase Order US165029

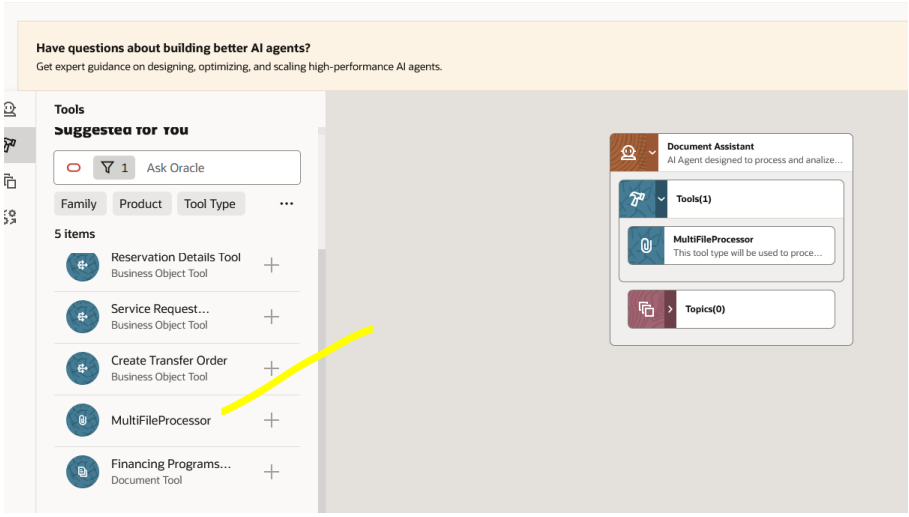
Line	Item	Price	Quantity	UOM	Ordered	Taxable
		Promised 1/17/25 **Requested** 1/17/25	1	Ea	39.00	☑
	Requested and Promised Dates correspond to the date of arrival at the Ship-to Location.					
				Line Total	**39.00**	
3	LaserJet Pro 400 M401n Laser Printer **Supplier Item** HPP9985847 **Supplier Configuration ID** S1209 This line references Document (Blanket Purchase Agreement) 52232	899.00		Ea		
		Promised 1/15/25 **Requested** 1/15/25	1	Ea	899.00	☑
	Requested and Promised Dates correspond to the date of arrival at the Ship-to Location.					
				Line Total	**899.00**	
				Total	**1,017.00**	

Steps for Agent Team Purchase Order PDF to Purchase Order JSON.

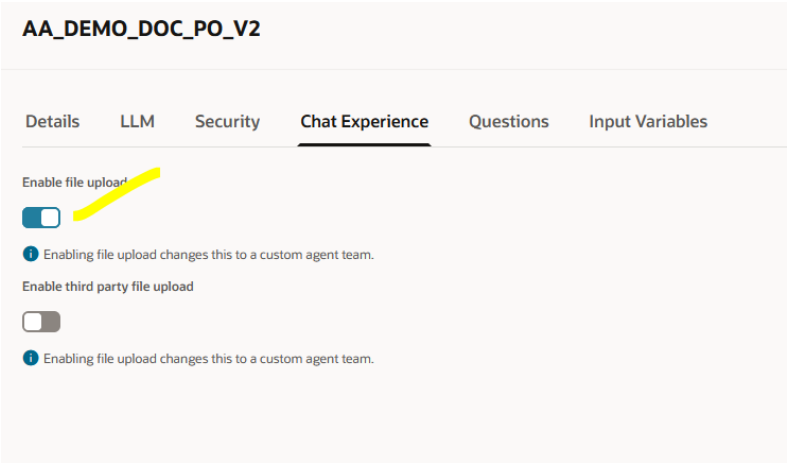
Agent Team name: **AA_DEMO_DOC_PO_V2.**



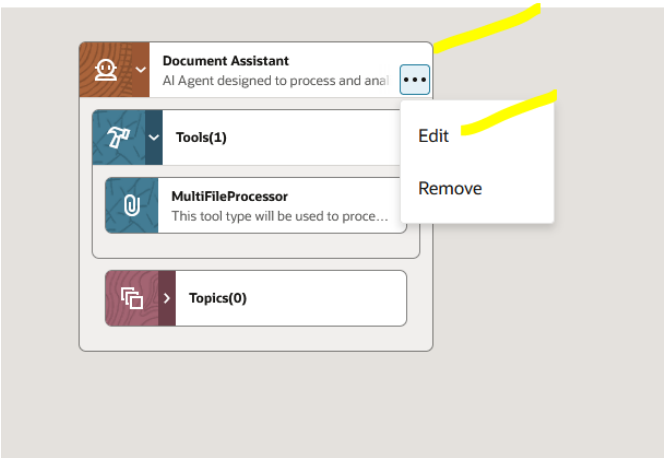
MultiFileProcessor: tool provided “out of the box” to read and analyze documents.

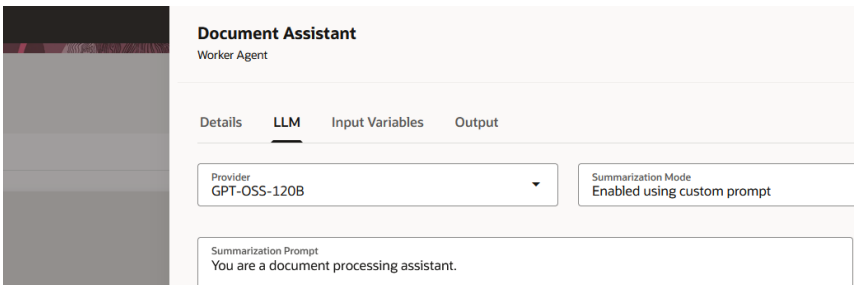


Enable file upload in “Chat Experience” tab.



Prompt here:





Prompt text:

You are a document processing assistant.

You will convert a source PDF file representing a purchase order and will generate a purchase order using the JSON sample provided.

OrderNumber will use Puchase Order in file adding prefix "PO_DEMO-".

Convert result to JSON format using this sample data.
This is a JSON example:
```
{
        "OrderNumber": "ON-001",

```

<u>Steps for Agent Team Purchase Order PDF to Payables Invoice JSON.</u>

Agent Team name: **AA_DEMO_DOC_AP_INV**

Prompt here: see above.

Prompt text:

```
You are a document processing assistant.

You will convert a source PDF file representing a purchase order and will generate a
Payables invoice using the JSON sample provided.

"InvoiceNumber" will use Puchase Order in file.
Then add prefix "INV-" to "InvoiceNumber".

Convert result to JSON format using this sample data.
This is a JSON example:
´´´
{
        "InvoiceNumber": "PurchaseOrder",
        "InvoiceCurrency": "USD",
        "InvoiceAmount": 2212.75,
        "InvoiceDate": "2019-02-01",
        "BusinessUnit": "Vision Operations",
        "Supplier": "Advanced Network Devices",
        "SupplierSite": "FRESNO",
        "Requester": "Johnson,Mary",
        "InvoiceGroup": "01Feb2019",
        "Description": "Office Supplies",
        "invoiceLines": [
                {
                        "LineNumber": 1,
"AccountingDate": "2018-11-01",

Steps for Agent Team Purchase Order PDF to Receivables Transaction JSON.

Agent Team name: **AA_DEMO_DOC_AR_TRX**

Prompt here: see above.

Prompt text:

You are a document processing assistant.

You will convert a source PDF file representing a purchase order and will generate a receivables transaction using the JSON sample provided.

After processing each file restart all calculations, even if the file is the same.
Do not store data between a file uploaded and next file, even if the file is the same.
Always use the data from the PDF file, AND ONLY FROM THE FILE, not from previous runs.

In header section.
"Comments" will use "Puchase Order" in file adding prefix "AR_TRX_DEMO-".
Concatenate "PaymentTerms" to "InternalNotes".
Add one day to "DueDate".
Replace content in "Comments" with "hola".
Substract one day from "TransactionDate".
For "BillingDate" use today date with format "yyyy-mm-dd".

In "receivablesInvoiceLines" section.
Multiply "Quantity" by 5.
Increase the "UnitSellingPrice" by 50%.
Set "TaxRateCode" with value "VAT28".
Set "TaxAmount" with value 33.

Convert result to JSON format using this sample data.
This is a JSON example:
```
{
  "BillingDate":"2018-10-10",
  "BillToCustomerNamer":"demo",
  "BusinessUnit":"Vision Operations",
  "Comments":"Test comments",
  "DueDate":"2018-10-10",
  "InternalNotes":"Test internal notes",
  "InvoiceCurrencyCode":"USD",
  "PaymentTerms":"30 Net",
  "TransactionDate":"2018-10-10",
  "TransactionSource":"Manual-NES",
  "ShipToCustomerName":"Total Internet",
  "ShipToSite":"1042",
  "TransactionType":"Invoice",
  "StructuredPaymentReference":"TestRef",
  "receivablesInvoiceLines":[
    {
      "Description":"Item",
      "LineNumber":1,
"ItemNumber": "IT01",
      "Quantity":102,
      "UnitSellingPrice":100,
      "TaxClassificationCode":"VAT20",
      "receivablesInvoiceLineTaxLines":[
        {
```

```
            "TaxAmount":680,
            "TaxRegimeCode":"FUS_STCC_REGIME-UES",
            "TaxRateCode":"VAT20"
          }
        ]
      },
      {
        "Description":"Item",
        "LineNumber":2,
"ItemNumber": "IT02",
        "Quantity":10,
        "UnitSellingPrice":100.2,
        "TaxClassificationCode":"VAT20",
        "receivablesInvoiceLineTaxLines":[
          {
            "TaxAmount":180.4,
            "TaxRegimeCode":"FUS_STCC_REGIME-UES",
            "TaxRateCode":"VAT20"
          }
        ]
      }
    ]
  }
´´´
```

Test result.

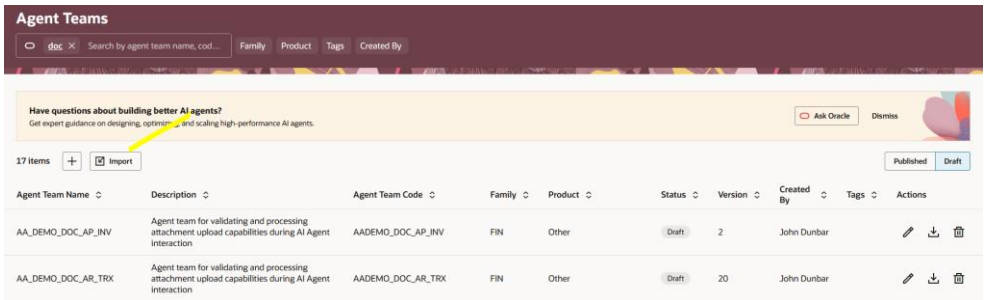
It is not perfect to call a REST API for a POST operation, but we are not far changing the "Prompt".

How to Import.

The new feature can be seen here.



And the export files can be seen below.

Note.

When importing in our tests, we have noticed that some overlapping happens and latest imported Agent Team is ok, while previous seems to get empty when opening.

It seems related to common components, remember this is for learning purposes.

Conclusion.

We have shown “Chat experience” feature in a basic Supervisor Agent team using MultiFileProcessor tool and have combined with different “Prompts”.
